WORK EXPERIENCE

Full Stack Developer   9/2023 – Present
DIPC Software l Ahmadabad IN

- Built scalable backend systems for scheduling and task management using **Spring Boot** and **Node.js**.
- Implemented secure authentication with **Spring Security** and **Express.js**.
- Optimized workflows for health tracking and consultation management.
- Developed task tracking and collaboration features to boost productivity.
- Delivered high-performance solutions with a focus on efficiency and scalability.
- Integrated multimedia uploads (photos/videos) to enhance task reporting and user experience.

PROJECTS

College And Faculty Management System
Faculty Portal

- Developed a secure portal for faculty to manage personal details, lecture schedules, attendance, and subject notes using Spring Boot. Integrated Zoom for online lectures, automated student notifications for leaves, and enabled seamless communication with the HOD. This enhanced operational efficiency and streamlined academic workflows.

Hotel Menu-Order Online Web page
HomeTown Pizaa

- Created a web page where users can view pizza details and place orders. The project was developed using updated HTML, CSS, JavaScript, and Bootstrap for the frontend, with Spring Boot for the backend, providing an interactive and seamless user experience

About me
Portfolio

- Developed a responsive portfolio website using React, utilizing React-Bootstrap for sleek design and React-Icons for enhanced visuals. Integrated smooth navigation and interactive elements to create a seamless user experience and strong digital presence.
